AMAZON CLOUDWATCH EVENTS

- Amazon CloudWatch Events delivers a near real-time stream of system events that describe changes in Amazon Web Services (AWS) resources. Using simple rules that you can quickly set up, you can match events and route them to one or more target functions or streams.

- You can use Amazon CloudWatch Events to invoke the Lambda function on a recurring schedule of 15 minutes. This solution is entirely automated and serverless.

- Alerts you about events happening in your AWS resources.
